

SignalTrac is GPS North America's proprietary solution for fleet management. We've developed SignalTrac as a true enterprise platform offering state-of-the-art hardware, an intuitive,

SignalTrac™: The Platform for Enterprise Fleet Management

web-based management dashboard, and the ability to integrate with a range of third-party systems and software.

SignalTrac stands out from other GPS tracking solutions on the market today. To be sure, it delivers the "standard" results you would expect to achieve with any solution. But it also

offers a host of other key features and advantages:

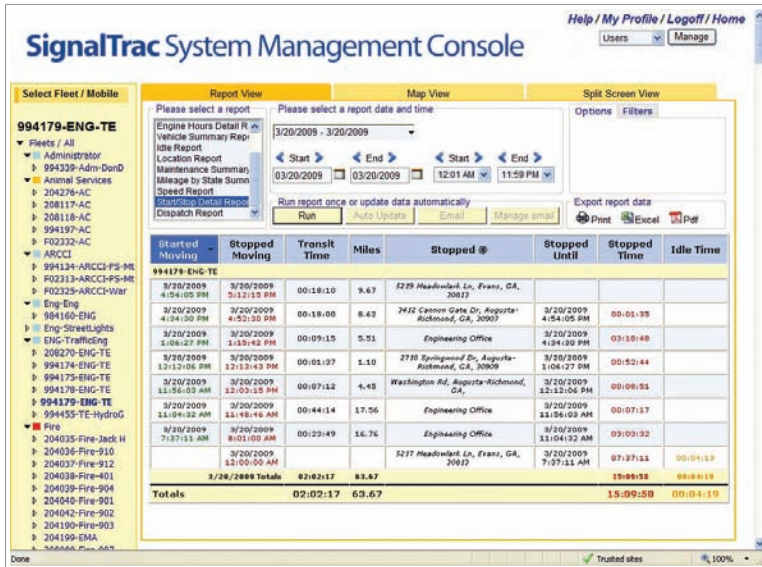

SignalTrac is discreet and virtually impossible to defeat. A core component of the SignalTrac solution is its SmartAntenna. The size of a credit card, this state-of-the-art device installs covertly in your vehicles and does not require any external antenna on the windshield or roof. It's also tamper proof thanks to a "heartbeat" function, which sends a location report every hour on the hour after the engine is turned off. It even provides a tow-away alert, notifying you if a vehicle is moving without the ignition being turned on.

SignalTrac is incredibly easy to use. This platform offers an intuitive web dashboard that you can view from any Internet-connected workstation. It gives you real-time visibility into the status of your fleet. So you can stay informed — and in control — whether you're in the office or on the road.

Track. Communicate. Dispatch. Document.

SignalTrac seamlessly integrates robust dispatch functionality. Other solutions allow you to dispatch jobs one at a time. With SignalTrac, you can store and send up to 30 days of dispatch instructions. SignalTrac also supports two-way messaging with drivers, who must respond to each request you send. And it gives you full visibility into jobs that employees have deleted, preventing “miscommunication” about expectations.

SignalTrac supports better business decisions. With SignalTrac’s web dashboard, it’s easy to view in-the-moment and historical information about the performance of your fleet. Through customizable reports, you can monitor employee, vehicle, and overall productivity. You can identify and address recurring issues. You can even track vehicle maintenance — helping ensure that preventative service is performed as scheduled.

SignalTrac pays for itself. Used properly, SignalTrac empowers you to save significantly on insurance premiums, fuel and overtime costs, and vehicle repairs. It also enables you to increase productivity and enhance customer satisfaction. In other words, this solution typically pays for itself within a matter of months!

Get on ‘Track’ to Enhanced Productivity and Service

The first step to a more successful business is simple: Contact GPS North America. We’ll take the time to listen to your situation and your challenges — and then we’ll recommend an optimal solution.
